FlowAI

Current product and security scope

Version 2.0 · 2026-10-26

Documented product focus

Workflow-specific automation for document-heavy compliance processes, traceable evidence, visible human review, and explainable decisions. A human reviewer remains responsible for the compliance outcome.

Demonstrations

Website presets, CSV examples, scores, and outputs are synthetic or sample demonstrations. They do not establish document-extraction capability, customer outcomes, production performance, or autonomous decisions.

Certifications, approvals, and service commitments

This document does not claim a regulatory approval, security certification, independent audit, regional readiness, uptime commitment, support SLA, or standard commercial offer. Planned work is not presented as currently available.

Evaluation questions

Confirm workflow availability, data handling, hosting, retention, subprocessors, integrations, API access, and commercial terms with FlowAI for the specific evaluation. Do not send sensitive documents through public demonstrations.

This is a public scope summary. It is not a certification, audit report, regulatory approval, or standard service commitment.
